FourColour Process transfers

"Rush option" available

## FourColor

**FourColor** is a CMYK screen-printed transfer born of the union between offset printing and traditional screen-printing. Offset offers a photo-quality printing and an unlimited number of colours. Thin line resolution is remarkable. These multi-colour transfers are created with an opaque white undercoat and a transparent powder glue coat for enhanced elasticity. The glue in overflow makes application easy and ensures high washing resistance. **FourColor** can be applied to many textiles, light or dark.

- CHARACTERISTICS AND ADVANTAGES**
- Very elastic
  - Thin line and detail printing
  - Unlimited number of colours
  - High washing resistance
  - Ironable
