

 "Rush option" available

**FourColor** is a CMYK screen-printed transfer born of the union between offset printing and traditional screen-printing. Offset offers a photo-quality printing and an unlimited number of colours. Thin line resolution is remarkable.

**FourColor** can be applied to many textiles, light or dark.

These multi-colour transfers are created with an opaque white undercoat and a transparent powder glue coat for enhanced elasticity. The glue in overflow makes application easy and ensures high washing resistance.

Options available upon request to our sales team: **Special colours, fluorescents** and **glitter**.

- CHARACTERISTICS AND ADVANTAGES**
- Satin finish, luminous colours
  - Printing of complicated designs, fine details, and colour gradients
  - Very elastic
  - High wash resistance
  - Washable at 60°C
