SeriQuadri is a CMYK screen-printed transfer born of the union between offset printing and traditional screen-printing. Offset offers a photo-quality printing and an unlimited number of colours. Thin line resolution is remarkable.

These multi-colour transfers are created with an opaque white undercoat and a transparent powder glue coat for enhanced elasticity. The glue in overflow makes application easy and ensures high washing resistance.

Options available upon request to our sales team: **Special colours, fluorescents, metal and glitter.**

## CHARACTERISTICS

- Transfer combining offset printing and traditional screen-printing
